

Instructions for E-Mail Setup on Android Devices

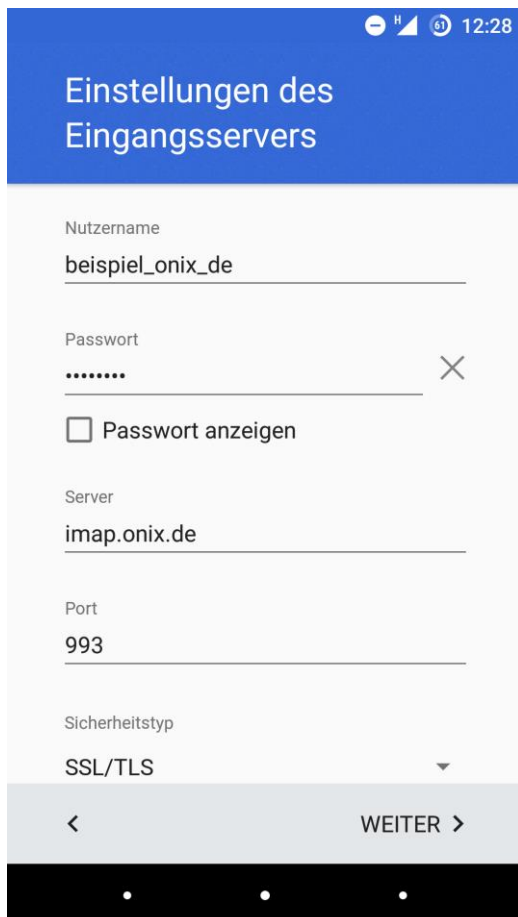

First you have to type in your E-Mail address and tap on „Next“ for the next Steps.

After that you get asked for your Type of your E-Mail account.

Then you have to type in your password and tap "Next" to confirm.

Now you have to enter the infos for the inbox. Here you need the following data.

Username: The Username that you get with your password and E-Mail.

Server: imap.onix.de

Port: 993

Encryption: SSL/TLS or SSL

The screenshot shows the 'Einstellungen des Ausgangsservers' (Outbox Settings) screen. The fields are filled with the following information:

- Nutzername: beispiel_onix_de
- Passwort: (masked)
- SMTP-Server: smtp.onix.de
- Port: 587
- Sicherheitstyp: STARTTLS

At the bottom, there is a navigation bar with a left arrow, the text 'WEITER', and a right arrow.

At least you have to enter the information for your outbox.

Username: The Username that you get with your password and E-Mail.

Server: smtp.onix.de

Port: 587

Encryption: STARTTLS

If you follow the steps about, you can tap on "next" to confirm and start using your E-Mail.
