- 9. Port 587 should be set for SMTP, if not, please change it
- 10. If you have checked everything, click on "Done"

Create E-Mail-Addresses in Outlook-App

Initial Setup of an email address

- 1. Start the app **Outlook** on your Apple device
- 2. At the first start, the Setup assistant will open
 - Do you want create another E-Mail-Address, then go to the next section
- 3. Now enter your E-Mail-Address, then click "Add Account"
- 4. Select in "Advanced", IMAP

- 5. Now enter in the signed fields your email address, username, and your password
- Check the preset server fields for correctness, imap.onix.de with port 993 and security SSL, smtp.onix.de with port 587 and security STARTTLS, if everything is correct, click at the very bottom on "Login".

- 7. You will see information about Outlook, confirm this with "Next"
- 8. You can add another E-Mail-Address directly after the setup, if necessary, following the same procedure, if you do not want to add another one, click "**Maybe Later**".
- 9. You have successfully set up your E-Mail-Address

Add another E-Mail-Address

- 1. If you want to, **add another email address**, open the menu in the top left corner of the Inbox.
- The side menu opens, click on the highlighted icon and then click on "Add E-Mail Account ", now follow the first instruction [Initial setup]
